Senior Developer Advocate

Experience

Vonage – London, UK (Remote) – *Senior Developer Advocate*

January 2022 - Present

iOS Developer Advocate

June 2020 - December 2021

- Defining the early product and developer experience for a new serverless platform.
 - Gathering requirements and feedback from multiple external teams to inform feature prioritisation.
 - Identifying and resolving potential conflicts by leading inter-team communication.
 - Writing documentation, sample projects, and tutorials.
 - Holding training sessions, providing technical and architectural support to facilitate adoption of the product across the organisation and with external partners.
 - Contributing to the serverless platform using Go, TypeScript, and Python.
- Advocating and presenting company products at conferences and meetups worldwide.
- Speaking at various conferences such as NordicJS, iOSDevUK, and iOSConfSG.
- Providing product expertise for pre-sales implementations and ongoing post-sales support.
- Supporting junior colleagues with help preparing for talks, reviewing technical writing, and code reviews.
- Collaborated with engineering and product teams to deliver new versions of the Voice and Chat SDKs.
 - Led efforts rewriting existing documentation and building sample projects with other advocates.
 - Helped product and engineering teams prioritise features in order to deliver on time.
 - 200% increase in SDK usage after release.

Deliveroo – London, UK – *iOS Engineer*

July 2018 – June 2020

- Worked on the consumer iOS app, using Objective-C and Swift with GraphQL. Also contributed to a Go backend service. Features I contributed to include launching new markets, adding support for collection, and server driven restaurant cards.
- Was actively involved in onboarding, interviewing and hosting community events.
- Presented at the NSLondon meetup about a server driven UI project.
- Drafted an app modularisation proposal to improve the developer experience as the team and app scaled.

GitHub – London, UK – *Campus Rep*

March 2017 – June 2018

- Supported 8 Campus Experts in the London and SE England region by holding office hours and an unconference to discuss how to better their communities.

Starling Bank – London, UK – *Software Engineer Intern*

July 2017 – September 2017

- Worked on the iOS app, which used Swift with RxSwift. I built an in-app widget to share bank account details, and an integration with a 3rd party partner, Flux, to enable digital receipts.

Skills

Proficient in iOS development, Swift, SwiftUI, Objective-C, Git, JavaScript, Node.js

Experience with Java, Go, GraphQL, Kotlin, Android development, React Native, Python, TypeScript

Awards

Apple – WWDC Scholarship

May 2016

Awarded a scholarship to visit Apple's developer conference in San Francisco after submitting an iOS application which used the 3D Touch APIs with AVFoundation and SpriteKit.

Education

City, University of London – *BSc (Hons) Computer Science*

July 2018

During my time at university, I co-founded the Computing Society, served as Vice-President, and later as President. We successfully secured sponsorship to host events on campus, including an annual 24-hour hackathon that attracted over 150 participants from across Europe.
